

(SWAD ENTRY)
FAMILIAR SPIRIT

SEERSGATE SAYS:

There was a familiar spirit in the dwelling that I visited. This has been a major plan—to deal with these demons in real ways fully. It was looking at me from another room. The person that this familiar spirit looked like definitely resembled a dead relative.

This demon was in that dwelling for many years and even spoke to the person closest to the deceased. That will make it a clear way to see that many who grieve their loved one think there would be a way given for that person to leave the Heaven or the Hell to come and meet them, as if there is true freedom from the death spirit, to do so. Once you are dead, only through the Great Way King Jesus will allowance be given to set any person free from the bondage under the death spirit.

I saw this familiar spirit come and torment little children. I heard of others trying to communicate with it. Don't you truly see that Satan will work on getting children in a plan to engage his demons while they are still very young? Do not dismiss your children's cry for help when they say they see creatures or anything scary in their room. Make sure you pray over your home and anoint it in the blood of King Jesus.

But the first step ever to getting your home under Yahweh's order would be to cleanse it, with removing anything that would give Satan a territorial right to be in that dwelling. Cleanse it from the natural and the spiritual avenues. Learn to ask the Great Holy Spirit if you should read certain Scriptures to help you get your details in order. You will most likely need a plan for systematic removal of the old way while sealing the entryways, as it's cleansed.

God can shut down the familiar spirit in the family line. But when others want it to stay, it will make it hard to clean up all of those plans that have been in place with the demon

being in familiar ways with others. Have a way to look at why there would be a familiar spirit in the first place. Has any in your family planned a visit with any demon, using any form of witchcraft? Has any engaged a spirit that masquerades as a family member? Has any received a gift or bought an object to cause an entryway to be made that welcomes demons by territorial right?

What about your children: Have they been telling how a man or woman, or young child has been in their room after they are left alone at night? Most demons prefer to visit children in the dark hours when they are alone and afraid to call out for help. Some hours of the day are special times when witches, warlocks, and Satan-based church members come and conjure up unique plans in celebration of their master.

Spiritual gates are real; so also would be demons and angels. It would be wonderful if every person had a will only to see angels, yet that would be a fairytale. Satan will make sure he reveals his will in sending his demons to any who would have a weak way and yield to let him take a ruling way. There must be a real release and cleansing in the family to have this demon cut off.
