

I WENT BACK IN TIME

My life has always been different. I will not say that I had a life like the others in my family. This person who journals this detail wished she was in the unseen world for so long, yet she must have been in it continually and just wasn't looking at those experiences as truly unique. But the God I serve allowed me many trips into seeing the unseen detail. The first plan to move in coming to my attention was when I was just a young child. I was able to see what was moving around me, yet I couldn't know what was really interacting with me. No one would embrace that a little girl would know of these details in the unseen.

I can recall a church service in a sanctuary, where it was dead and the meeting was ritualistic, but God still showed me His plan as if it was a moment taking place in front of me. I was in the pew, just waiting for something to take place. It was a boring way of living, yet I knew there must truly be something greater than what I was doing. As I waited and was in the church service, it was as clear—a view of King Jesus there at a love gathering with the men that were close to Him, where it was a goodbye meeting known as the Last Supper detail. The way that they moved was as if I stuck my head through their window and looked in to see the scene in real movings.

I will take what is given and never forget that Yahweh allowed me to move in this way of having a vision as if it was happening, to see what was moving in what He gave in this moment. I will never find a way to see the meeting in today's language due to seeing His plan in the way that it took place. I went back in time with a vision. I was still there in the church service, yet the Great Way King Jesus allowed me to see a glimpse of His moment while on Earth in the previous plan with His disciples before He was crucified. I will let it end at this point in the sharing. Next will be a new detail.
